

INTRODUCTION TO THE SCIENCE BEHIND HEALING SILKS

The Healing Silks Company founded the creation of natural 100% pure silk Energy Healing Scarves, Meditation and Prayer Shawls and many other energy healing silk products to enhance, expand and unify energy fields. On our website, www.healingsilks.com, you will learn that each design is Divine Inspiration. Through prayer and pure intention during creation of the silk, the molecules in the fiber of the silk fabric are energetically altered at a subatomic level.

If you're interested in learning more of the key elements of the powerful Healing Silk designs, which embrace inspired Energy Fractal energy, the frequency patterning of Sacred Geometry, Sacred Healing Colors and Healing Codes read the articles throughout our website. The combination of the sacred design and intention creates the harmonic resonance of each Healing Silk. Much like a tuning fork, this energy transference affects the frequency or the vibration of the harmonic resonance of the individual cells thus affecting the purity and peace of the wearer's physiology.

Physicist Richard Taylor from the University of Oregon and his team of researchers have found that exposure to fractal patterns can lessen a person's stress levels by 60%.

Lesley Anne Vincent, Master, Path of The Sacred Heart, states, "In my experience, I have found that wearing your Healing Silks with their inspired design amplifies the Divine Geometry at the cellular level. The fractal frequencies, in the silk, actually align separated aspects of all the wearer's energies into a unified field. Each Healing Silk has a 'note' - a frequency - on the 'Light and Sound Ray.' That 'note' intonates the correct pattern in the field, in the meridian, and in the cells of the wearer."

Silk, the strongest natural fiber known to man is a *protein fiber*. *The shimmering appearance, for which our Healing Silks are prized, comes from the fibers' triangular prism-like structure. Each silk fiber emits photon (light) energy, in a wave-like phenomenon, which allows the silk cloth to refract incoming light at different angles.*

Because *silk has a crystalline texture*, this structure, when energized during its creation, *creates an ionic energy with an uplifting effect* much like the energies felt while sitting in meditation near a fast flowing mountain stream. *Each silk is energetically imprinted to emit a soothing, calming, nurturing frequency pattern*, which when worn on the body, activates and balances the Life Force Energy of the wearer. When combined with the wearer's Loving intention, *the Healing Silk allows a wonderful amplification for a deeper connection* during prayer, meditation or quietude.

By brushing the healing silk over the body, energy fields are enlivened for an energetic "tune-up", relieving stress, re-establishing balance and harmony, and activating a calming, soothing entrainment of the (brain-heart) body-mind connection. As the wearer revitalizes and balances all subtle energy fields with these comforting healing silks, they will find a unique de-stressing relaxation. Wearing a Healing Silk during a short meditation in the evening will help create a flow of balanced energies bringing about restful sleep with peaceful vivid dreams.

Energy Healers, Health Professionals and those seeking recovery to perfect health report the Healing Silks to be effective used alone or in conjunction with various modalities of Energy Healing, Vibrational Medicine, Energy Psychology and conventional medical practices.

When using Healing Silks to clear and open energy pathways, charkas, meridians and bio-fields, a wearer receives more vital energy, greater clarity, pain relief, accelerated healing from surgery as well as lesser side-effects from chemotherapy. The vibrant color spectrums in each design are permanently imprinted and do not need recharging. The positive energy embedded in the designs cannot be neutralized. However, the 100% silk fabric responds well to Love Energy (as in prayer) and acts somewhat as a container to hold your positive energy.

Healing Silks designer, Diana Wesley states, Greater degrees of health and well-being result when you, ***“Wrap ‘your cells’ in the healing possibilities of a Healing Silk.”***
